Standards: State of the art confusion

By EUGENE E. WOODBURY
Staff Writer

In Greenville, S.C., there is a conservative Christian university that believes in standards more than BYU believes in standards, however difficult that may be to believe. These are people who may be able to help us above the knee — and it doesn't matter if you happen to be a cheerleader, either. These are people who don't rely on the fatherly advice of pastors or bishops to keep their youth on the straight and narrow — they send cheerleaders along on dates. Think I'm kidding? Bob Jones isn't. As far as he is concerned, not being in world means not being of the world, even if that means being a bit out of it, as well.

Brigham Young University, on the other hand, would rather err on the side of pragmatism, even if that means being a little bit of the world in the process. This, of course,

brings to mind all those awful analogies about how you can't be a "little bit" of anything. But BYU is trying awfully hard — succeeding, most of the time and falling on its face every now and then.

Balancing conflicting interests has never been an easy job for anyone. Needless to say, BYU Standards Office is up on the high wire every day of the week. Those poor bureaucrats have to deal with a great many "interests" that don't conflict with philosophies, and they must settle for remedies often so confusing they don't seem to understand them. Consider, for example, the football player that goes on at an BYU basketball game: The players on the floor wear shorts, the male yell leaders on the sidelines cannot wear shorts; female cheerleaders can wear miniskirts (very short dresses); students sitting in the stands, however, cannot wear shorts or miniskirts. Confusing? You bet. Nevertheless, the real standards issue is

more often than not occluded by the undue attention granted to grumblings about dress and grooming (not that such grumblings are unjustified, though). The real standards question is about how BYU can preserve its crystal clear image and the aura of innocence it projects and not at the same time compromise academic integrity — for the heart and soul of any respectable university is its liberal arts college, acedemies and opinionated philosophies included.

From any logical standpoint, the tradition of the liberal arts college would appear to be foundering at the BYU, but if so, it is floundering in a very strange way. The Variety Theater, we all know, would never consider showing a movie like "Shogun's Machine" or "Endless Love," but it will show the latest James Bond film (opening credits excised); and if you find film censorship annoying, the standards on which those movies are based are on shelf in the Harold B. Lee Library. Academically,

at the same time a wrong opinion about evolution could lose you points on a religion test you could be taking — one of several classes on evolutionary biology or genetics. And probably the most often heard aside in the JKH is, "This is a good book (movie, play) — just don't tell anyone I said so."

In other words, what has developed here at BYU is a liberal arts college that is half underground. In the shadow of that towering, stainless steel (Teflon?) image, the books burned elsewhere are read, the issues branded heresy elsewhere are discussed, and all those movie theaters down in Provo fill up every night, thanks to discount tickets, courtesy of ASBYU. Just so long as certain tender hearts are protected, apparently, scholarship can go on, full-steam ahead, and the BYU administration can have its cake and eat it too. As Carl Sagan might say, "Incredible."

LETTERS TO THE EDITOR:

Typo pursuit

I just thought you would like to know that folks around campus are finding uses for The Universe other than reading the shallow semantically sound editorials. I've a friend who lines her birdcage with it — and not for the obvious reason of keeping her pet well-informed, either. My botanist friends swear its only real use is for blotters in their plant presses — just the right format, they say. Lately, we've found a new way to use The Universe — a sort of contest, really. We call it Typo Pursuit. The player who finds the most typos wins, and is "Editor of the Day." A couple of weeks ago I won by finding thirteen mistakes in the Friday paper. It would have been a tie between my friend with the bird and myself, but I won on a technicality, having found a paragraph that consisted of three nearly unrelated sentences connected by commas, of all things. Not really a typo, but the severity of the mistake, exposing both the writer and the editors, was the decisive factor in the win. I was proud of that one.

The typos are varied, as these examples of the Monday, Oct. 22 edition illustrates: 25 percent of the public... read a daily "newspaper" most people are not well versed in nuclear arms negotiations; the statement "chad" for "tall"; they finally were "married out" May 24; a scene of a plane — derived "blow" products; he cared for me "offhanded" held as well as on.

Personally, at graduation time, looking for a job writing or editing, I wouldn't want to be cut out that I'd wanted as a writer or editor of The Universe. Heaven is all I'd like

ture employers ever read back issues of the paper just to check up.

What is porno?

No one is trying to ban cable TV. No one is trying to tell us which programs to watch. Pornography (material intended to arouse sexual desire) is already "forbidden" in most countries of the world because it "tends to corrupt and lead to sexual crimes" (Encyclopedia Americana). Porno is already illegal even on cable in the U.S. However, some use the status of Venus in pornography, and others say nothing is. To me, the Cable TV Decency Act is an attempt to define what should be cut from movies, etc., to make them non-pornographic in the standards of the community without waiting for everyone to agree what is pornographic.

Choice of sequels

Editor: I thought you thought all sequels came out last summer. Stay around Tuesday and you'll have a chance to choose between two blockbuster sequels: Carter II and Reagan II.

You saw the first movie, so I don't need to review what's happened so far. All I ask is, which one will you pick? Reagan II is the one I'd like to see. The Return of the Gipper with popular movie star Ronnie and his sidekick George? Or, would I like to see former co-star Fritz Reiser play with... (the rest of the text is cut off)

First Lady from Queens in "The Right Stuff"

Choose well. You're going to be watching one of those for the next four years. Check local listings. There's many other offerings out there in the other theaters besides just the White House.

No bowl better

"Holiday Bowl? Where is it? Na, what is it?" These were the comments by some Missourian football team members (Tigers) when they learned where they were going to be for their post-season bowl last year. They sounded insulted and implied the Holiday Bowl (HB) was not good enough for them, even though they had just lost their regular season final to, of all teams, Kansas (44-1). The Tigers were not in the Top 20 and yet they were laments with the Holiday Bowl?

We could only grin and explain their attitude problems or their gross ignorance. After the game, the Tigers' attitude changed from mere ignorance to bitterness. Most BYU fans couldn't understand how they could feel this way. After all, they brought in an "inferior" team to a fine post-season bowl and lost to an exceptionally good BYU team, right?

As it turns out, I'm beginning to understand the Tigers' rancor. Stated simply, the Holiday Bowl is not a good bowl. We have become the subjects of our own propaganda. Year after year, we hear, "New Year's bowl has had the razzi; but the Holiday Bowl is the best bowl in the country." (The rest of the text is cut off)

and spectacular; these games are. We hear Coach Edwards say before each season that "Winning the Holiday Bowl is our ultimate goal." Well, after six years of spectacular games and highly regarded bowl teams, the HB is ranked only 16th out of 18 Bowls (in payoffs). This year, even with a host team listed in the Top 5, the HB Committee states they still can't draw a highly ranked competitor. They have actually considered having teams like Oregon, Stanford and (gasp) can you believe? Kansas.

Really has finally struck home — the Holiday Bowl "stinks" and has only been doing a disservice to the WAC Champions. Perhaps it is time for the WAC to break off with the Holiday Bowl, or maybe as "open post-season", even with an occasional "No Bowl" could only be better than what the Holiday Bowl has to offer. WAC Commissioner: Stand up and take notice!

Relief from the high cost of education

Disease causes fear of outside

1 in 20 adults suffer from the disorder agoraphobia

By KAREN E. HILL
Universe Staff Writer

Jeanine is bright, talented, and a young mother of three. She is also afraid to leave her own home.

This woman has a condition known as agoraphobia. Because of her disease she won't leave her home to do the shopping, attend a movie or even take a drive in the country. For Jeanine, these situations bring dreadful stress and intense fear which make her heart beat rapidly, her legs feel weak and her hands sweat. Moreover, she has no idea why she feels as she does, and because she won't leave home, she has little chance of getting help.

Jeanine is a fictitious composite of the symptoms that face many agoraphobics. Dr. Mark Owens, a psychiatrist at the University of Utah, is preparing to study agoraphobia in the Salt Lake City area. He is confident there are many suffering from the disease in the area since the national statistics show one in 20 adults suffer from agoraphobia. They come from all social and economic groups, and their condition generally develops in late adolescence or early adulthood and tends to be chronic.

This debilitating disease strikes women more than men. Owens added they are usually in the prime of their lives when they should be enjoying all the good things they have worked for. The attacks begin gradually, and as situations in life become uncomfortable for the agoraphobic, she withdraws more and more until going out at all is impossible.

Agoraphobia consists of two parts. The emotional side is basically fear. Dr. Owens. Individuals differ in the areas of fear, such as shopping or driving, but they all have one thing in common — they all give in to their fears.

The physical side is a panic attack. Owens said the attacks are caused as the result of a chemical imbalance. Fortunately, agoraphobics respond to medication, he added. "We have found anti-depressants help overcome the attacks." Because these drugs help, there may be some similarities between panic and depression.

on a biological level.

To be technically considered as undergoing a panic attack, the patient must have at least four symptoms. "We find most patients have about nine of the symptoms," said Owens.

Some of these symptoms are difficulty in breathing, fast heartbeat, chest pain, choking sensation, dizziness, hot and cold flashes, sweating, trembling and a feeling of being out of control.

Getting help for agoraphobia is sometimes difficult. "Most I then are able to function somewhat, and they hide their problem from those who would help, such as friends and family," said Owens. Because they feel their fears are unfounded, they try to overcome them alone.

Agoraphobics tend to be depressed and anxious people. However, it isn't known if the disease causes the depression and anxiety or the other way around. Recurrence agoraphobics are so diversified in their causes and symptoms, there is not enough clinical evidence gathered yet to discover many similarities.

Daryl M. Woods, a recovering agoraphobic, has written a book called "Afraid of Everything: A Personal History of Agoraphobia" in which she tells of her personal struggle. She maintains that as a child she was discouraged from being herself by her family and made to conform to the ideal that women are only wives and mothers.

This influence caused a conflict within her between the family's ideal and her personal goal to be a doctor. She never married, and even though she did not reach her goal, she did become successful in the business world. Though therapy and after suffering as an agoraphobic for 10 years, Woods learned that these differences created great internal struggle because she felt she had failed as a woman. When she could no longer function, she was hospitalized and eventually returned to her home.

She could no longer support herself as a real estate agent because she feared going outside to show property. She was afraid of traveling, going to the opera and even driving the car.

Illustration by Brian Andre

Shopping consisted of dashing into the store, grabbing the necessary items, rushing home, physically tired and mentally exhausted. Woods said she felt a tremendous fear that something would happen to her every time she went out. Finally she no longer left her home for any reason.

She never consulted a doctor, and she was unfamiliar with her symptoms and dismissed her with a prescription for tranquilizers. These proved to make the problem worse, said Woods.

She did not seek help again for a long time and then only when her friends made her.

At the time of publication of her book, she had been in therapy for five years. Woods said between the anti-depressants she was taking and the therapy, she was finally in control of her life. Even though she still mourned the loss of years in her life that should have been productive, she was very happy to be recovering, she said.

U.S. losing zeal for conservation

WASHINGTON (AP) — With oil prices down to less than \$29 a barrel and natural gas prices stabilizing after five years of sharp increases, Americans seem to be losing some of their zeal for conserving energy, according to newly released government figures.

A report by the Energy Information Administration says per capita U.S. energy consumption dropped only 2.4 percent in 1983, compared with annual declines of 4 percent to 1 percent drops in the previous three years.

The report was issued just as the Organization of Petroleum Exporting Countries concluded an emergency meeting in Geneva, Switzerland, where the cartel made cosmetic cuts in oil production in an effort to prop up their posted price of \$28 a barrel against discounts of \$1.50 to \$2 discounts offered by many producers.

Energy Secretary Donald Hodel said prices should be about \$25 a barrel because of a lowering of world demand, much of it induced by conservation.

The Energy Department's Energy Information Administration said Americans are using an average 21 percent less energy than a decade ago, when the 1973 Arab oil embargo sent prices on an upward spiral that was not broken until two years ago at \$34 per barrel.

Since 1970, lower thermostats, less travel and more fuel-efficient cars, machinery and appliances have reduced by 25 percent the amount of energy used to produce the nation's goods and services, after discounting for inflation, the report said.

Residential energy use, three-fourths of it for space and water heating, fell only 0.6 percent last year as prices stabilized for natural gas, still the primary fuel for more than half of all America's single-family homes.

JST of Bible closest to Old Testament

By JEAN ESPUN
Staff Reporter

The Joseph Smith Translation of the Bible is the closest existing version of the original writings of the Old Testament patriarchs, according to Robert J. Matthews, director of the BYU Religious Studies Center.

"If one only has the King James version of the Bible, one has to conclude either that the patriarchs of the Old Testament didn't have a full knowledge of the gospel or that they didn't write it down," Matthews said Friday during the BYU symposium on the JST.

"If you have the JST, you know that they did have a full knowledge and did write it, that their writings were lost," Matthews said.

Many of the truths they knew at night, such as those about the accountability of children and Satan's rebellion, were lost and did not come to light again until Joseph Smith revealed them in his translation of the Bible, he said.

In the King James version of the Bible, it appears that the Old Testament patriarchs had no knowledge of the gospel, that, until Noah, they made no covenants with their God and that there was no continuity between the various patriarchs. But in the JST all these things are apparent, he told the audience.

"It is not surprising that Joseph Smith translated the Bible. 'Revelation builds on revelation. There is a relationship between the revelations in the Doctrine and Cove-

nants and those in the JST," Matthews said.

Matthews said he is often asked if the Hebrew, Aramaic and Greek versions of the Bible bear out what is shown in the JST. They do not, he said.

While some small things show support by the new translations, the large doctrinal concepts are not.

"The problem isn't one of translation. It is one of transmission. There are plenty of scholars who can translate the manuscripts of the Bible that we have . . . the heart of the problem is the absence of complete manuscripts on doctrinal subjects."

"Those records just haven't been preserved in clarity or accuracy," he said.

The additions in the JST sometimes add new information and meaning to already existing scripture, he said.

"They make our understanding greater."

Other times, however, they add new information that did not exist at all in the other versions of the Bible.

Members of The Church of Jesus Christ of Latter-day Saints need to realize that Joseph Smith could not have revealed these truths found in the JST without the power of revelation, Matthews said.

For many years the JST had been neglected by members of the LDS church because "We didn't have access to the manuscripts (of the JST), but now they are included in the LDS church's new edition of the Bible. We can't neglect our second chance with it," Matthews said.

Vitamin A suspected cause of birth defects

TORONTO (AP) — Accutane, a prescription acne medication made from Vitamin A, is a powerful cause of birth defects, suggesting that massive doses of Vitamin A itself may cause fetal malformations, a new study concludes.

A woman who gives birth to a child after being exposed to Accutane during pregnancy had about a 20 percent chance of delivering a malformed child, Dr. Edward Lammer said Thursday in a paper presented at the annual meeting of the American Society of Human Genetics.

"Compared to other teratogens (substances that cause birth defects), that's high — very high," said Lam-

mer, of the U.S. Centers for Disease Control.

Accutane, introduced in September 1982, is the brand name for a acid form of Vitamin A called isotretinoin. It is supposed to be used only for severe cystic acne cases, but it is so effective that Lammer said doctors may be overprescribing it — and patients may be demanding prescriptions.

Y wins another WAC title, rolls over UTEP Miners

By TOM WALTON

Universe Sports Writer

It will be another Holiday in San Diego for the third-ranked BYU Cougars.

BYU's 42-9 shellacking of the hapless UTEP Miners, coupled with Hawaii's 31-28 win over Wyoming, clinched the Cougars' ninth consecutive WAC championship and assured a trip to their seventh straight Holiday Bowl.

After the contest, Holiday Bowl chairman Vinny Visano formally extended the Holiday Bowl invitation to Coach LaVell Edwards and BYU co-captain Craig Gerrick, amid audible boos by the fans who had stayed for the ceremony.

"We are in a position where we have our No. 1 goal taken care of," said Edwards. "The Holiday Bowl is our No. 1 goal each and every year."

"We will now have to rethink our goals. We are now in a position where we can vie for the national title or receive the highest national ranking we've ever had," he said.

Almost lost in all the hoopla was the game itself. Then again, a Cougar victory was almost a foregone conclusion.

UTEP came into the contest thinking ball control. "We saw it was the three-back teams (like Air Force and Wyoming) that have given us all the most trouble," said Miner head coach Bill Yung. "We wanted to control the ball and stay close, hoping something good would happen in the fourth quarter. But BYU is really good both offensively and defensively. I hope they go 42-0."

The Miners impressively kept possession of the ball for 41 minutes of the game, but even more incredible was what BYU did with the 19 minutes it had possession.

It was Robbie Bosco once again cracking the whip with 19 pass completions in 31 attempts for 237 yards and four TDs. Bosco did throw one interception.

After UTEP's opening drive culminated in a missed 50-yard field goal, Bosco quickly marched the Cougars 66 yards down field in only four plays. The drive was capped by a 42-yard pass to Glen Kozlowski for the touchdown.

On its next drive, BYU scored again. This time Bosco hit Adam Haysbert on a four-yard scoring strike. For Haysbert, it was his first touchdown catch since the game-winner against Pitt. Haysbert went on to catch another TD later in the contest.

"Anytime you catch a TD from the No. 1 quarterback, it's great," Haysbert said. "The TD felt so good. I was kind of worried when I got hurt so early in the season. I thought I'd like to score again or something."

After Haysbert's touchdown, the Cougars could have settled in the second half and waited for the Miners to come out and attempt to catch up.

Kerin (UTEP's quarterback Ward) has a hard time throwing the ball," said Yung in explaining the Miners' 3-yard and a cloud-of-dust offense.

This offensive scheme kept the score down, but put many fans in the stands who were bored, but the team wasn't bored," said Edwards.

In the second quarter, the Cougars increased

BYU's Val Sikahema returns a punt against Texas-El Paso. The No. 3-ranked Cougars had little trouble with the lewty Miners, disposing of UTEP 42-9.

their lead to three TDs. BYU went 58 yards in nine plays, Bosco scrambling out of the pocket and hitting Mark Bellini with an 11-yard scoring pass.

UTEP scored late in the half on a 27-yard Hugo Castellanos field goal.

In the second half, BYU rediscovered the run. The Cougars took the second half kickoff and scored in two plays — surprisingly, both rushing plays.

Kelly Smith took a handoff and swept around the right side for 67 yards. It was the longest run from scrimmage for a BYU player this season. Lakei Heimala then scored on a 13-yard draw play.

On their next possession, Smith capped a 68-yard

drive with a 12-yard jump for a TD, again around the right side. Smith finished the game with 106 yards on four carries.

Smith is the third Cougar back to run for over 100 yards in a game this year. "I've been in the right place at the right time," said Smith. "It's a good feeling to get over 100."

The final BYU touchdown was set up by a Kurt Couvela defensive gem. Couvela batted away an attempted UTEP punt, then had the shifty ability to catch the ball in mid-air and return it to the UTEP 18.

Sun Devils sink Y swimmers

By TOD SANDERS

Universe Sports Writer

The BYU women's swim team took it on the chin Friday night, and it was the Arizona State Sun Devils who landed the blow.

The final tally was ASU 71-BYU 65, but the score is not indicative of just how powerful the 10th-ranked Sun Devils were.

With ASU owning a 50-20 advantage after the first nine events, the visitors entered all but one of their swimmers in the next four races under the "exhibition" classification, which essentially means they forfeited most of the possible points.

"They called off the dogs," said BYU coach Stan Crump.

This sportsmanlike move by Arizona State enabled the Cougars to narrow the gap considerably. In spite of the powerful showing by ASU, there were several bright spots for the Cougars.

Senior Melanie Rile looked capable of revelling in her 1982 form when she was named All-American. Rile won the 200-yard and 100-yard freestyle and finished second in the 500-yard free.

In addition to her individual accomplishments, she also swam a sizzling anchor leg to help the Cougars win the 400-yard freestyle relay, which was the last and most exciting event of the night.

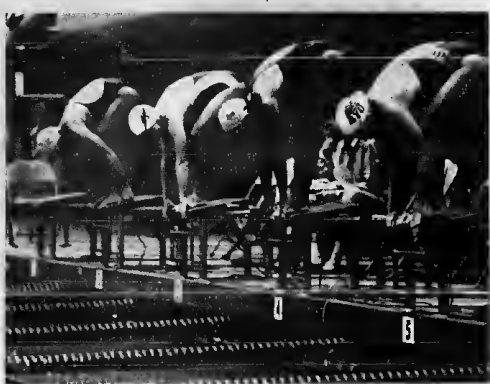

"I was tired because of the hard workouts we have been having," Rile said. "But I felt energetic, and that is what pulled me through."

The 400 freestyle relay was a nail biter from start to finish.

Kim Doman swam a blazing second leg to overtake the Sun Devils' Amy Reed. Florence Christensen then swam stroke for stroke with her ASU opponent on the third leg, and the teams were virtually tied when Rile jumped in the pool to go against All-American Betsy Leiva.

Rile performed to leave the Norwegian in her wake as she pulled away to win the relay.

Crump seemed pleased with the way his swimmers performed against an ASU squad that featured four swimmers who participated in the Olympic trials, in addition to the All-American Leiva.

Swimmers get ready to dive off the blocks in Friday's BYU-ASU meet. The powerful Sun Devils could have crushed the Cougars, but forfeited several races to make the final score close.

Even though our times were not that impressive, I feel really good about how we did," Crump said.

They were as strong as we knew they would be," continued Crump. "but if you want to become a big time team, you have got to swim against big time schools."

The match was indeed a learning experience for the young Cougar team that has only two seniors on the squad. But they will get the opportunity to take the lessons they learned up to Salt Lake City on Saturday when they take on arch-rival Utah.

No. 1 Washington wins big

NEW YORK (AP)—No. 1-ranked Washington, which had been struggling the last two weeks, exploded offensively Saturday in a 44-14 rout of California while second-ranked Texas trailed Texas Tech 10-0 at halftime, but pulled out a 13-10 victory.

Elsewhere, third-ranked Nebraska whipped Iowa State 44-0, No. 5 South Carolina rallied from a 15-3 halftime deficit to nip North Carolina State 35-28, No. 6 Miami downed Louisville 38-23, seventh-ranked Oklahoma State trounced Kansas State 34-6, No. 8 Georgia held off Memphis State 13-3, No. 9 Boston

College fell to Penn State 37-30, and 10th-ranked Oklahoma celebrated the return of quarterback Danny Bradley by pounding Missouri 49-7.

In the Second Ten, No. 11 Auburn bowled to No. 13 Florida State outlasted Arizona State 22-14. No. 15 LSU nipped Mississippi 32-29, No. 16 Ohio State crushed Indiana 50-7, No. 17 Iowa was tied 10-10 by Wisconsin, No. 18 Southern Cal beat Stanford 20-11, No. 19 Southern Methodist shaded Texas A&M 28-20 and No. 20 Texas Christian defeated Houston 21-14.

Spikers rebound after losses, win two in UCLA invitational

By NEIL BAIR

Universe Sports Writer

After dropping its first two games Friday, the BYU women's volleyball team rebounded with two victories Saturday to finish 2-2 in the UCLA National Invitational Volleyball Tournament this weekend in Los Angeles.

The tournament marks the end of a tough road trip for the Cougars, which saw them drop four of seven matches. BYU will return home this week to face New Mexico and New Mexico State Friday and Saturday at High Country Athletic Conference net.

The Cougars meet Weber State on Monday. All three matches will begin at 7:30 p.m. in the South Fieldhouse.

The Cougars had the unenviable task of facing Cal Poly-San Luis Obispo and Southern California to open the tournament on Friday. Cal Poly and USC are third and fourth in the NCA's polls, respectively, according to the NCA's polls.

Cal Poly nipped BYU in the best-of-three match 15-13 and 16-14 in the tournament opener for both teams. The win by the Mustangs avenged a 3-0 humiliation

"We played very good defense in both matches and Tami set up our hitters very well throughout the entire tournament,"

— Coach Elaine Michaelis

and at the hands of BYU last month in Provo.

BYU fell to 0-2 in the tourney as they were beaten 15-13 and 15-6 by the Trojans. After dropping a close first game, the Cougars jumped out to a 6-0 lead before USC answered with 15 consecutive points to win the match.

Senior Rachel Hoglund had 13 kills in each of the two matches to lead the Cougars. Against USC, BYU was without the services of senior outside hitter Karen Deane who was sidelined with the flu.

"We played competitively against the top teams," said BYU coach Elaine Michaelis Friday night. "We really missed Karen not being at full strength against Cal Poly and not being able to play against Southern Cal."

On Saturday, the Cougars rallied as

they defeated Lamar University 15-11 and 15-4, and Cal State-Northridge 15-4 and 15-4.

Against Lamar, Hoglund had 11 kills for the Cougars, who controlled the match from the outset. Sophomore Socorro Leal had seven kills and Deane came back after her bout with the flu to add six. Sophomores Yonda Skousen and Corinne Russell each added five digs and two saves for BYU.

Hoglund again led the Cougars with nine kills against Cal State-Northridge, the top-rated team in NCAA Division II. Deane and Leal had seven and six kills, respectively, and senior Tami Hamilton contributed five digs and three saves.

"We played very good defense in both matches, and Tami set up our hitters very well throughout the entire tournament," said Michaelis.

The Cougars finished in third place in their pool, behind USC and Cal Poly.

BYU's record now stands at 24-18 for the season, 5-3 in conference play. Last year, BYU finished fifth in the prestigious UCLA tournament, which annually attracts many top 20 teams. The Cougars' only losses were to the then-No. 2 UCLA Bruins and No. 1 Hawaii in the tournament quarterfinals.

Flutie surpasses McMahon's mark

By THE ASSOCIATED PRESS

College football has a brand-new total offense king in Doug Flutie of Boston College, who Saturday surpassed former BYU quarterback Jim McMahon's career total of 9,723, 10,093 career yards.

Flutie fired for 447 yards against Penn State, but his performance wasn't enough as the Nittany Lions prevailed 37-30.

The 5-foot-9 signal caller now has

Cougars win 9th title in a row

Coach LeVell Edwards and the BYU gridironers celebrate another West Athletic Conference championship. The Cougars' 42-9 triumph over UTEP clinched a ninth consecutive crown.

Continued from page 5

Two plays later Haybert was on the receiving end of his second touchdown pass.

The Holiday Bowl may appear to be a bit comical, but Haybert is genuinely pleased with the prospect of playing once again in San Diego. "I'm not bored with it," he said. "I'm excited about it. You can't get bored in California."

For Coach Yung and his Miner squad, the best goes on. It has to be tough when a team has won nine straight games.

The WAC is improving. You can tell by looking at the scores," Yung said. "Sure, this conference is weak in some areas, but so are conferences like the Big 10 and the Southwest."

"I think the best games BYU has had have come from teams right here in the WAC. The WAC is definitely improving," he said.

Yung may be right, but for what was supposed to be a rebuilding year, the Cougars have dominated the conference from the outset. BYU is the first team to clinch a conference championship and a bowl bid in NCAA Division I.

In so doing, the Cougars also increased their consecutive game win streak to 20.

Hawaii ends Cowboys' hopes; Utah defeats Colorado State

By THE ASSOCIATED PRESS

BYU may have been winning its ninth consecutive Western Athletic Conference title on Saturday, but that wasn't the only action in league on Saturday.

Following BYU's afternoon victory, Wyoming had retained the only shot at tying BYU for the WAC crown. It was a longshot, predicated on BYU losing its final two league games. But the Cowboys were edged by Hawaii 31-28 in Honolulu Saturday night, failing to 4-3 in league play and giving the title outright to the Cougars. The victory was Hawaii's sixth in a row.

In the weekend's other WAC game, Utah defeated Colorado State 35-23 in Salt Lake City.

In non-league action, Air Force suffered

a blow to its post-season bowl hopes by bowing to Army 24-12 at West Point, New Mexico suffered its fifth straight loss in losing to Baylor 38-21 in Waco, and San Diego State succumbed to Nevada-Las Vegas 30-14 in San Diego.

Wyoming tailback Dave Evans rushed for 113 yards and three touchdowns, but his performance was offset by Hawaii quarterback Raphael Cherry, who completed 22 of 29 passes for 332 yards, breaking a 36-year-old school record for passing yards in a game. Cherry flipped two TD passes to tight end Kent Unterrmann, and Louis Santiago and Nua Faoala ran for scores.

"This six game winning string is one of the more incredible things that has happened since I've been coaching," said Hawaii coach Dick Tomey. "It's not been

hits, runs and errors that have been incredible. It's been the spirit of these guys."

Freshman tailback Eddie Johnson rushed for 224 yards on 20 carries to lead Utah over CSU. Johnson had a school-record 248 yards last week, and thus became only the second runner in WAC history to have back-to-back 200-yard games. Arizona State's Art Malone did it in 1968, but Johnson's 478-yard total was greater than Malone's 438.

Colorado State turned the ball over on its first four possessions and fell behind 21-0 before mounting a second-half rally. Craig Stappa, overcoming a sprained ankle and a sore hamstring, kicked an Army record five field goals as the Black Knights tripped mistake-prone Air Force.

Defense leads Bears past Raiders

The game billed as a battle of former BYU quarterbacks turned into a hard-hitting defensive struggle as Walter Payton rushed for 111 yards and scored two touchdowns and the Chicago defense turned in an outstanding effort to lead the Bears to a 17-6 victory over the Los Angeles Raiders Sunday in National Football League action.

The bruising battle saw three quarterbacks knocked out of action at various times — Marc Wilson and David Humen of the Raiders and Jim McMahon of the Bears. McMahon, who suffered a bruised kidney, was hospitalized after the game for observation and tests.

Elsewhere in the NFL, it was Cleveland 18 Buffalo 10, Green Bay 23 New Orleans 18, Pittsburgh 36 Houston 7, the New York Giants 10 Dallas 7, San Diego 38 Indianapolis 10 and Minnesota 27 Tampa

Bay 24 Philadelphia and Detroit fought to a 23-23 deadlock.

In other games, it was San Francisco 23 Cincinnati 17, Seattle 48 Kansas City 0, the Los Angeles Rams 16 St. Louis 13, Miami 31 New York Jets 17 and Denver 26 New England 19.

Atlanta travels to Washington on Monday night.

Kicker Jan Stenerud booted a 52-yard field goal with two seconds remaining to lift Minnesota over Tampa Bay and end a five-game losing streak.

Detroit kicker Eddie Murray hit the right upright with a 21-yard field goal attempt in overtime and the Lions had to settle for a tie with the Philadelphia Eagles.

All Haji-Sheikh kicked four field goals as the New York Giants swept their two-game series with Dallas for the first time

in 21 years.

Dan Marino passed for 422 yards and two touchdowns, leading the undefeated Miami Dolphins to their 10th straight victory.

Dave Brown, Keith Simpson and Ken Easley ran back four intercepted Kansas City passes for touchdowns — an NFL record — as Seattle eked out the Chiefs.

Safety Dennis Smith picked up a fumble and ran 64 yards to score the clinching touchdown as Denver, 9-1, came from behind to stop New England. It was Denver's eighth straight win.

Despite throwing a career-high four interceptions, Joe Montana led San Francisco over Cincinnati, the winning touchdown a 4-yard pass to Freddie Solomon with 1:30 remaining in the game.

Y employer of 8,000 students

Campus jobs offer benefits of convenience, higher pay

By LISA REESE

Universe Staff Writer

Almost one-third of the students at BYU have on-campus jobs. Dennis Moore, a junior from Oregon majoring in zoology, works 20 hours a week at the HBL copy center.

Jobs provided by BYU help make it possible for many students to continue their education. Donald R. Lyman, director of employment services at BYU, said one of the first things taken into consideration when a job opens up is to try and include the student.

Employment on campus ranges from unskilled jobs to highly skilled positions. These jobs vary from secretarial positions to food service from technical specialists to clerical work, and from ground crew to campus security.

Lyman said BYU employs approximately 8,000 students during the Fall and Winter Semesters, nearly one-third of the full-time student body.

An employee normally has to be a full-time student to have an on-campus job, he said. Twenty hours a week is the maximum amount a student can work, with schedules varying for each job.

Lyman said currently there are more students looking for jobs than there are jobs available, but the trend is on an upward swing.

Lyman said the economy of the area makes a difference on the campus job demand, he said. Each year it can be different; the decline in population, he said, there are jobs available, but the trend is on an upward swing.

Providing employment for students is important to BYU administration, Lyman said. Incompleteness at other universities, BYU usually shows higher proportions of student employees than other schools.

All jobs on campus are necessary to the functioning of the university. No

make-work situations are involved.

Lyman said if a student works on campus and has no other source of income, he would probably be able to support himself financially through the year. "But, if a student comes to school broke," he said, "of course it will be more difficult for the student. Each situation is different with individual needs and responsibilities."

Lyman said the turnover rate for student employees varies on the average from six to nine months.

Dawna Brandow, a sophomore from Manteca, Calif., majoring in marketing, said she chose to work on campus mainly because of the convenience. She works as a secretary in School Relations.

"I also heard that BYU paid a lot better than off-campus jobs," she said. "They also worked around my basic schedule. When I decided to go home and work for the summer, they were understanding by hiring someone to replace me only for the summer. When I came back in the fall, I was able to have my same job back."

"Three basic reasons helped me to decide to work on campus," said John Talley, a senior from Hudson, Ohio, majoring in Spanish.

First of all, the pay is a lot higher on campus than off-campus jobs.

But the nicest thing about working on campus is that "you can be assured of what the environment is going to be like," Talley said. "I know I can go to work and feel comfortable with the people and what's going on around me."

Historic highlights recalled from former days of Nov. 5

(AP)—Today is Monday, Nov. 5, the 100th day of 1984. There are 56 days left in the year.

Today's highlight in history: On Nov. 5, 1888, George O. Selden of Rochester, N. Y., received the first U.S. patent for an automobile.

In 1605, the "Gunpowder Plot" failed as Guy Hawkes was seized before he could blow up the British Parliament.

In 1872, suffragist Susan B. Anthony was fined \$100 for attempting to vote in the presidential election for Ulysses S. Grant, who won.

In 1911, Calbraith P. Rodgers arrived in Pasadena, Calif., having completed the first transcontinental airplane flight, aboard a Burgess-Wright biplane, in 49 days.

In 1940, Franklin D. Roosevelt defeated Wendell L. Willkie to win an unprecedented third term as president.

In 1946, Massachusetts Democrat John F. Kennedy began his political career by being elected to the U.S. House of Representatives.

In 1953, Richard M. Nixon made a political comeback as he defeated Vice President Hubert H. Humphrey for the presidency of the United States.

Concern grows over 'sucker'

Putting fish on endangered list could hurt economy

By JAY RUYBALD

Universe Staff Writer

If the U.S. Department of Interior puts the June Sucker on its endangered species list, it could cost the Provo River a critical habitat, said a Provo city official.

Leland Gamette, executive assistant to the mayor, told a group at the city's public hearing recently he believes such action regarding the "trash" fish could cost the economy \$50 billion to \$80 billion.

Local people refer to the June Sucker as a trash fish because it serves no real purpose to the public, whether recreational or practical.

Other city officials believe the fish should be protected but oppose designating the Provo River as a critical habitat for fear of the impact on the economy.

The Department of Interior has proposed designating some portions of Lower Provo and Spanish Fork rivers as critical habitat, which would mean total isolation for the area from any outside source deemed as a disturbance to the preservation of the fish.

Gamette said the city is concerned farmers and utilities would lose all or part of their water if the river is protected. He also said strict dredging regulations could cause water from the river and Utah Lake to rise, threatening Provo City Airport, agricultural land, businesses and up to 500 homes.

Officials from the Central Utah Water Conservancy District are also concerned about the federal proposal because they believe it would affect several proposed projects for the central Utah Project.

which includes the diking of Provo and Goshen bays.

Lynn S. Ludlow, conservancy district manager, said proposed water projects would not affect the June Sucker population. He said the state already protects the fish as a threatened species of fish for the recent decline in sucker population.

"Stocked, exotic species, such as walleye and white bass, feed on the suckers and contribute to the decline in population," he said.

Robert Ruessink, U.S. Fish and Wildlife Service fishery biologist, supported Ludlow's comments when he said the June Sucker population has declined slowly in the last 30 years mainly because some species of predatory game fish have been introduced to the lake.

Utah Lake is the prime known habitat for June Suckers, and a conservation group's spokeswoman said the reason enough to put the fish on the endangered species list.

Dorothy Harvey, Intermountain Water Alliance coordinator, said because the fish use a portion of the Provo River for spawning, "this is justification for implementing the act."

Another opponent of the federal proposal, Eldon Laird, director of public affairs for the conservancy district, said plans for the Central Utah Project involving the diking of Provo and Goshen bays would introduce an additional 9,500 acres of farmland and 105,000 acres of water.

An acre foot of water is approximately 325,000 gallons, and Laird said this is enough to fill the needs of a family of five for one year.

Laird also said the proposal would hurt the farming industry here since the water from the Provo river used by farmers would be cut off if it were declared a critical habitat. He noted that the enormous fruit crops of this area would particularly be hurt.

One more reason opponents of the proposal cite is the possibility of flooding. If Provo river and Utah Lake are declared critical habitat, then diking of the two areas would not be allowed. Dredging would also be prohibited.

Laird further noted that lake activities such as fishing and motor boating would not be allowed, and this would put a crimp in the business economy.

In the recent hearing, Gamette argued that the fish would become extinct anyway, even if the mentioned areas were declared critical habitat. "Declaring the areas as critical habitat would have nothing to do with its becoming extinct or not," he said.

According to Ruessink by Ruessink, the June Sucker was once very abundant in this area and was used by early Indians as a food fish.

JUDICIAL, LEGISLATIVE AND POLITICAL INFLUENCES ON WESTERN STATE WATER RESOURCE POLICY

Various scholarships available N.Y. glass gallery 'swank as can be'

By JONATHAN ANKLE
Universe Staff Writer

Students attending BYU in 1963 had a chance to win a scholarship by designing the student nurse uniform for the College of Nursing.

Today, students do not have many opportunities like the students of the 1960s. Donald D. Shaw, associate dean of the College of Physical Education, said, "The scholarships reward the bright students; we tend to discriminate because of grades."

Shaw told of one student who was below the 2.2 grade point average necessary to become a teacher. "She wanted to be a teacher, so we worked with her and helped her improve until she had the qualifications needed," he said. "She was chosen as teacher of the year at her school during her second year of teaching."

Shaw said if students want a scholarship today they need to "pay the price." He said one price for high school students is increasing math and language skills. "High school students are more interested in getting through than learning and preparing themselves."

Former BYU President Ernest L. Wilkinson told of the school's first donation in his book "The First Hundred Years." "The first scholarship donated to the Brigham Young Academy was from the Utah County Board of Education under the direction of its superintendent, Wilson H. Dusenberry."

The \$300 donation provided a semester's tuition for 20 students.

The First Presidency of The Church of Jesus Christ of Latter-day Saints made their first contribution for the scholarship fund in 1892.

The amount donated was \$400 and was specified to cover the tuition for 10 students, 50 percent of whom needed to be male. Six women applied for the scholarships, which brought about the first competition.

BYU's first athletic scholarship program was developed in 1919. BYU was accepted into the Rocky Mountain Athletic Conference in 1918.

Pete Witbeck, assistant athletic director, said, "The NCAA has allowed 96 full grants-in-aid for the football team. This amount allows for only 30 to be used on new recruits."

A full grant-in-aid includes full tuition, room and board, a loan for needed books and a job program, which BYU does not participate in.

Witbeck said, "An athletic scholarship is not just a gift. The athlete has earned his grant just like a scholar has." Witbeck said athletes are encouraged to achieve and apply for scholastic scholarships so the grants-in-aid will go further.

Fort Stevenson, director of students financial aid, said, "95 percent of BYU's scholarship money comes from the LDS Church and the other 5 percent from private donation."

The scholarships are split into two areas, incoming and continuing students.

"Incoming students are judged on academic merit as well as how they have prepared themselves," said Stevenson. "Since President Holland has been here a strong emphasis has been placed on how well the students have prepared himself."

The purpose of the student financial aid office is to help students who are in need. "Students with sensitive financial situations should not just stop at our window and ask a question," said Stevenson. "They should come in and make an appointment with one of our advisors."

The top scholarship is named after the prophet of the LDS Church. The Kimball scholarship is a four-year award with an annual stipend of approximately \$2,100. A pamphlet put out by the financial aid office said, "Recipients are encouraged to study President Kimball's life and emulate those elements of leadership and character which make him successful."

The Trustees scholarship is the next highest award at approximately \$1,400 per year for four years. The Presidential scholarship, named on behalf of the president of the university, is a two-year award that covers the cost of tuition.

For a student to receive any type of financial assistance from the university, they need to be making academic progress. "Students with 2.0 GPA or higher who are in need may qualify for some of our scholarships," said Stevenson. "We encourage them to also check with their college as well."

"We have 35 to 38 private scholarships," said Delora Bertelson, administration assistant to the dean of the School of Management.

"We like to help out whenever we can; it makes you feel good to be able to help, kind of like Santa Clause," said Bertelson.

When asked if many of the students know about the scholarship programs available, Bertelson replied, "We put up posters in the halls so the students will know what is available."

"The dean sends information about the students who are on scholarship to the donors," he said. "BYU financial aid office encourages donors to put their gifts into an endowment."

Harsh treatment enrages inmates

MARION, Ill. (AP) — Inmates of the nation's highest-security prison, kept under emergency lockdowns for an entire year, described their life as boredom interrupted by abuse, fear, anguish and despair.

"They've got two philosophies working here — corporal punishment and psychological oppression," said George Aikward, one of 350 inmates of the troubled U.S. Penitentiary at Marion.

"Since this lockdown, they're saying, 'What was your right yesterday is not your right today.'"

The prison has been under emergency conditions since Oct. 27, 1983, five days after two correctional officers were stabbed to death.

Since 1976, we've had 20 killings, assaults on our staff and inmates, and numerous disruptions," said John Clark, executive assistant to Warden Jerry Willford.

"We went through outside assaults by helicopter and by high-powered rifles on our towers, a bombing of our training building outside the fence... finally, we were forced to lock it down."

All but about 50 inmates at Marion, which replaced Alcatraz in housing the federal prison system's most troublesome or violent convicts, are confined to their cells 24 hours a day.

Willford and Clark said the action was needed to ensure the safety of inmates and staff, but the inmates contend it is inhumane.

"The violations of our human, our civil, our constitutional rights are a continuous process," said Aikward, a Washington, D.C. inmate serving time for robbery and the killing of another convict.

"We can't do nothing about it."

"The same individuals that oppress you 24 hours a day are the same men who bring you your food," he said. "They'll hand it to you and make some remark."

He described a sense of futility echoed by dozens of convicts who complain that they are subject to psychological and physical abuse from guards and that isolation for extended periods fosters hostility and a sense of despair.

Clark said harassment is neither sanctioned nor condoned, and officers are disciplined when independent government investigation finds them at fault.

Willford said inmates can work toward making it an open prison and can even gain a transfer "by showing good-faith behavior."

Inmates counter that some of them serve three to four years of "clean conduct" yet remain locked down.

N.Y. passes driving law

ALBANY, N.Y. (AP)

— New York residents under age 19 who are convicted of driving under the influence of drugs or alcohol will now, under a new law, lose their drivers' licenses for at least a year or until they turn 19.

NEW YORK (AP) — When Arthur A. Houghton Jr. opened the Stenben Glass gallery during the Depression, he wanted it to be as swank as could be.

Fifty years later, pieces made by America's best-known art glass company bring between \$125 and \$275,000.

The blown, molded, cut, engraved or polished glass figurines, commemorative bowls and other art objects have become popular among the rich and famous as presidential gifts for foreign dignitaries.

"Stenben is used as often because it's a 100 percent American product... and we are very proud of that," said spokeswoman Chloe Zerkow.

The first such gift of state, the Mary-De-Round Bowl, was presented by President John F. Kennedy to Princess Elizabeth of England for her wedding in 1947.

President Jimmy Carter commissioned matching pieces for Israeli Prime Minister Menachem Begin and Egyptian President Anwar Sadat after the signing of the Camp David accord. As a wedding gift, President Reagan gave Lady Diana and Prince Charles of England a tawny bowl depicting the Crusades.

The company even keeps a registry of gifts given to heads of state so there won't be any embarrassing duplicates.

From simple to baroque, each piece is hand-

made and signed by craftsmen whose methods differ little from those of the 1600s.

Stenben's 200 craftsmen make only about 50,000 pieces a year. Many have

remains after final polishing, the piece is smashed. There are no factory seconds.

"We are not in the mass market," Zerkow said.

Children's television shows have taken a twist in programming in recent years. Instead of solely offering entertainment, many of the shows are used to market children's toys, home video and arcade games.

Some kid's shows are toy ads

By TIM CHAVEZ
Universe Staff Writer

Once upon a time in the land of television, children's shows were created for the sole purpose of entertaining children. Kids, toys and television have been part of America's Saturday mornings for the past three decades.

As show proved to be hit, manufacturers would come up with products based on the programs. For example, "The Mickey Mouse Club" created such a stir that the supply of Mickey Mouse watches and hats could not meet the demand. "Howdy Doody" fans rushed out to buy marionettes of the freckled furred puppet.

Over the last year or two, however, children's TV programming has taken on a new twist. Marketing-wise manufacturers and licensing agencies have reversed the process. Instead of waiting for a television program to become popular before marketing the toys, the toys are being introduced concurrently with animated television specials and series.

In the 1983-1984 Saturday morning children's television lineup, eight network programs were based entirely on toys and merchandise.

NBC introduced "The Shirt Tales," a successful show based on Hallmark Card characters that faced as well it was kept in the 1984-85 lineup. "Smurfs" is also a proven money maker for NBC.

ABC is offering "Mehchich," a monkey-like doll made by Mattel. Pac-Man, Man, Pac and Baby-Pac dominate the screen on the "Pac-Man Show."

Another ABC program is "Rabbit the Amazing

Cube," based on the puzzle fid.

CBS is airing a batch of creatures made popular in the arcade and home videogame fields — Frogger, Donkey Kong, Donkey Kong Jr., Q*bert and Pitfall, which all appear in "Saturday Supercade." CBS also has the Bikkies from Taff Merchandising and Dungeons and Dragons from the popular board game by TSR Hobbies.

As a result of the infiltration of television by toy manufacturers, several groups have taken action in the issue. Many parents and consumer groups are trying to protect children from what are being called "program-length commercials."

Last year at a press conference in Washington, Peggy Charren, president of Action for Children's Television (ACT) recommended the Federal Communications Commission take action to stop offensive programming. She said program-length commercials for toys and other products should be logged as commercial time, and she hoped they would be off the air by the end of the season.

Toy manufacturers are not the only ones to use the effective children's market. Food and snacks are being neatly packaged and presented on Saturday mornings. As reported in The New Yorker, it is now possible to buy a Barbie Doll accessory called "Barbie Loves McDonald's." For \$22.99 a person gets a plastic McDonald's counter with golden arches, a table and two chairs. McDonald's is identified as "The Fun Place Where Barbie and Her Friends Go to Eat." After the commercial, it's back to "Barbie's Dream House," another children's program.

Some critics of children's programming contend

that for years children's advertising was better than the shows they interrupted; however, quality is not the issue. "TV ads for Coke and McDonald's are produced and full of loving family messages; that doesn't mean television messes up children's versions of the warm and friendly thirty-second spots," said Business and Society Review.

As more was learned about the power of television, advertising moved into the shows. The National Association of Broadcasters Code prohibited hosts from pitching products within their shows. Warnings were given such as "We'll return to our program after a few words from our sponsors."

Peggy Fugel, of Peggy Fugel Advertising in Provo, feels that for older children, advertising can be a positive influence. "Children today have more money to spend than in the past and can use advertising to help them evaluate the purchases they are about to make," she said. "Children's advertising can be both entertaining and educational in that it appeals to a child's creativity and sense of adventure. It also helps a child in setting goals when he saves his allowance money to make a purchase."

"Children are more knowledgeable than a lot of people give them credit for," said George Barrus, a professor of communications. "Children are exposed to a lot of advertising all week long, especially on Saturdays. They are able to discern whether or not an ad lives up to its claims and make their evaluations of the product based on their experience."

Recently the issue of commercial children's television has been taken up by Congress.

Voters will choose 13th governor

SALT LAKE CITY (AP) — On Tuesday Utah voters will elect their 13th governor since the Beuthe State obtained statehood 88 years ago.

Church of Jesus Christ of Latter-day Saints leader Brigham Young was appointed Utah's first territorial governor by President Richard Fillmore, and 17 others filled that post after Young.

The state's first elected governor was Heber M. Wells, a Republican who took office in 1896.

Either Republican Norman Bangert and Democrat Wayne Owens will break the balance between parties holding the governor's chair on Tuesday. Both parties have elected six governors.

Only three governors — John C. Cutler, Simon Bangert and Charles R. Mabey have served single terms.

Wells served from 1896 to 1905; Cutler, a Republican, was in office 1906-1909; William Spry, Republican, 1909-1917; Bangert, Democrat, 1917-1921; Mabey, Republican, 1921-1925; George H. Dern, Democrat, 1925-1933; Henry H. Blood, Democrat, 1933-1941; Herbert B. Moe, Democrat, 1941-1949; J. Bracken Lee, Republican, 1949-1957; George D. Clyde, Republican, 1957-1965; Calvin J. Rampton, Democrat, 1965-1977; and Scott M. Matheson, Democrat, 1977-1983.

Pre-mission exams that meet Church requirements

So you're going on a mission. You've got a lot to do. And there's going to be a lot of people vying for your business. Who may or may not give you exactly what you need. Take dental exams, for example. The Church has very exacting requirements. Cougar Dental Center can help. With a \$30 pre-mission exam that meets those requirements, including:

- A thorough oral examination
- A complete set of 18 x-rays
- A 3-step cleaning process (scaling, flossing, polishing)
- And a long-lasting fluoride treatment

You get what you pay for at Cougar Dental. Call Dr. Phil Helt for an appointment today.

There's only one Cougar Dental!

Gene isolation could help body defenses fight cancer

NEW YORK (AP) — The isolation of one of the principal genes governing the human immune system could lead to sophisticated new methods of enhancing the body's defenses to fight cancer or blocking them to prevent organ rejection, researchers said.

In separate reports published in the scientific journal Nature, two teams of scientists said they have isolated one of the principal genes that enable white blood cells called T lymphocytes to identify and attack disease organisms, cancer cells and foreign tissue.

The gene, along with two other genes discovered earlier this year, appears to provide the blueprint for molecules

called receptors that are used by T cells to scan other cells and search for intruders, said Susumu Tonegawa, a biologist at the Massachusetts Institute of Technology and leader of one of two groups that independently isolated the gene.

"If you want to manipulate the immune system, you have to know what molecule you have to alter," Tonegawa said in an interview. "If you don't know what the molecule looks like, there's not much you can do." In a third study appearing in Nature, researchers at the National Jewish Hospital and Research Center in Denver said they had confirmed that the gene found by Davis and Tonegawa in mice re-
